Setting up English Saathi

For Hikmat Foundation staff · once per MacBook, about 15 minutes · macOS 13 to 26

1 Install

1. From Google Drive, download **English-Saathi-....dmg** (not the corretto file). If Drive can't scan it for viruses, click **Download anyway**.
2. Double-click the file. Drag **English Saathi** onto **Applications**. If macOS asks, type your Mac password.
3. Eject the "English Saathi" disk (⏏ in Finder).

2 Open it the first time

macOS blocks it the first time. This is expected.

1. Open **Applications** and double-click **English Saathi**. When macOS warns you, click **Done** (or **Cancel**).
2. Open **System Settings** › **Privacy & Security**. Scroll down and click **Open Anyway**.
3. Click **Open Anyway** (or **Open**) again. If asked, use Touch ID, or click **Use Password...** and type your Mac password.

Open Anyway shows for about an hour. If it isn't there, double-click the app again.

3 Allow the microphone

When macOS asks to use the microphone, click **Allow** (**OK** on macOS 13).

Clicked Don't Allow by mistake? Go to **System Settings** › **Privacy & Security** › **Microphone**, turn on English Saathi, then quit the app and open it again.

4 Clearer voices (optional, needs internet)

In **System Settings** › **Accessibility**, open **Read & Speak** (or **Spoken Content**), then **System voice** › ⓘ (or **Manage Voices...**). Download **Rishi (Enhanced)** (English (India)) and **Lekha (Enhanced)** (Hindi). Wait until both finish, then quit and reopen English Saathi. **Settings (⌘,)** › **Voices** shows their names.

5 Every day

1. Each student picks their own card.
2. **Settings** (⌘,): students, Add lessons..., speech model, microphone, voices.
3. **Results** › **Save as CSV...** saves every attempt, for the evidence.

6 New versions

Quit English Saathi, drag the new one onto Applications and choose **Replace**. Students' progress stays. Then do steps 2 and 3 again.

If macOS ever says the app is **damaged**, don't use it. Ask for a new copy.

Keep the MacBook plugged in during sessions. Everything stays on this Mac.
